

BREEZE S4

- > Outstanding design.
- > Fully active suspension with true shock absorbers for high comfort.
- > Tilting tiller and fully adjustable comfort orthopedic seat to suit everyone's needs.
- > Smooth and quiet operation.
- > Powerful LED front & rear lights.
- > Advanced electronic system that includes programmable drive controller and LCD display.

Afikim scooters have an established and respected reputation for providing exceptional reliability, comfort and quality. The new and enhanced **Breeze S4** continues this superb heritage with the addition of several new features. This was made possible by the latest advancements in scooter engineering and by the addition of a unique optional rigid canopy.

The new **Breeze S4** scooter combines stylish design and advanced technology. Designed with driver convenience in mind, its full suspension and shock absorbers have been re-engineered for an even smoother ride. The **Breeze S4** delivers levels of stability never seen before in the industry and will ensure users of 200kg to remain comfortable and in complete control in all driving conditions. The 3 HP German made motor and transmission delivers all the power and performance expected. An ergonomically designed tiller can be positioned to meet the owners' exact requirements. **Breeze S4** provides the optimum mobility experience!
